Architecture of a Startup Company

INSTITUTIONAL TRAINING SYSTEM

From Textbook to Classroom — without building the course from scratch.

A turnkey instructional system designed for colleges, trade schools, professional training programs, and institutional educators. Built from *Architecture of a Startup Company, Book I*, this package helps instructors teach enterprise formation, ownership, governance, organization, operations, and financial architecture without having to develop the entire course from the ground up.

Institutional Value | A COMPLETE, READY-TO-TEACH SYSTEM

Master Institutional Syllabus	Course structure, objectives, and scheduling
16 PowerPoint Presentations	512 professionally prepared teaching slides
The Architect's Teaching Notes	512 pages of instructor preparation material
Classroom Handouts	Printable original figures and applied exercises
Multiple Choice Bank	640 assessment questions
Short Answer Bank	192 questions with instructor guidance
Essay Question Bank	96 questions with model answers and evaluation rubrics
Comprehensive Final Examinations	Alternate examination forms and instructor keys
Enterprise Capstone Assessments	Integrated, practical enterprise evaluations
Instructor Administration Materials	Consistent implementation and academic discretion

Not just a textbook.

A complete teaching architecture.

Save substantial course-development time while retaining full instructor discretion in teaching style, grading, and classroom adaptation.
